Document 1: JP 2000-134667 A (Mitsubishi Electric Corp.), 12 May 2000

Document 2: JP 10-41923 A (Nihon Ido Tsushin Kabushiki Kaisha), 13 February 1998

The invention set forth in claim 26 does not involve an inventive step in the light of document 1 and document 2 cited in the international search report. The "frame synchronization signal" from the reception data format that is illustrated in document 2 (fig. 2) can be considered to correspond to the "control data for indicating the transmission timing" in the present invention.

The invention set forth in claim 29 lacks novelty and does not involve an inventive step in the light of document 1 cited in the international search report.

Document 1 (paragraph [0009]) suggests that it is possible to receive image data.

The inventions set forth in claims 2 to 25, 27, 28 and 30 are not disclosed in any of the documents that are cited in the international search report, and would not have been obvious to a person skilled in the art.
